
Weeks 7–10

General information

For everyone's safety and convenience, we remind you of the importance of respecting the instructions and barriers that are in place. This is crucial when renovations to the existing Ångström building begin, where demarcations between work areas are not as permanent.

ONGOING WORK

Work area Building 10

- Ground work
- Interior additions to the framework

Work area Building 9

- Contractor work to Building 9 is complete. The equipment site in the southern car park will remain for use during the renovation project.

Work area Building 1, Link to Building 10

- Additions to the framework for link between Building 1 and Building 10.

Work area Building 7

- Work begins during week 9 in the form of dismantling and demolition on floor 3.

Work area Building 6

- Work begins during week 9 in the form of dismantling and demolition on floor 3.

DISTURBANCES

- We give prior warning about all disturbances caused by noise, fumes and so on that we are aware of. However, it is not always possible to provide information about the times and extent of upcoming work.
- Ear plugs are available in the library, and all used products have safety labels and are not a health hazardous even if they can cause unpleasant odours.

Relevant disturbances for the coming period:

- Demolition in Building 6 and Building 7 can initially result in noticeable noises. We do not believe that the noise will be very loud, but there can be times when it may be heard in nearby buildings or adjacent floors.
- We work hard to maintain order and cleanliness in and around the work site, but there can be times when dirt and grime are spread. The floors in the stairwells can at times become messy. We ask for your understanding about this. The work will occur during a short period and all surrounding facilities will be cleaned and returned to their previous state as soon as the work is completed.
- If you are disrupted by the work or have opinions about how the work is being conducted, please do not confront the workers at the site. Instead, contact your immediate supervisor so that the project is directly informed and through the proper channels.

Closures, provisional arrangements

- According to the attached general plan.

Noticeable upcoming work (preliminary start times)

- Installation of automatic door opening systems, one door per floor in the stairwell in Building 9.
- Additional automatic door opening system equipment.
